Kivu Provincial Inspection Of Health

Coordination of communication to promote coordination

B.P 1899 Bukavu

TO: ANU-DRC (UNA-DRC)

The honor comes to us to approach your organization for soliciting support for communication and social mobilization in the fight against malaria during the World Day, celebrated on April 25 of each year.

Indeed, analysis of 2008 annual data in our Province of South Kivu, shows that the morbidity and mortality due to malaria are still of concern despite many efforts of all.

Several cases of malaria were registered in 2008, among these cases, it was found that pregnant women and children under 5 years are most vulnerable.

Thus, we expect to organize a day of reflection on the theme of World Malaria Day and community awareness on reinforcement of the use of long term insecticide treated nets, to achieve universal coverage in the province of South Kivu.

Please accept our expression of anticipated gratitude.

Herewith is the plan of the activities we envision.
